November 8, 2017

Van's is pleased to announce a Winterization kit for the current RV-12 with the ULS engine.

The kit includes an adjustable block off for the coolant radiator, and 3 sizes of cover plate for the oil cooler. Both can be adjusted or exchanged without removing the cowl to tailor them for changes in ambient temperature.

Detailed instructions for installation can be read in the Notification N-17-03-01 on the Support page for the RV-12.

<http://www.vansaircraft.com/pdf/Notifications/Notification-2017-03-01.pdf>

Shortens warm-up time for the oil, and improves cabin heat performance on those chilly days. Available now for \$33, just in time for winter (Northern hemisphere – our antipodean customers may want to wait til next March to order).

Part Number: 12 WINTERIZATION KIT

Keep warm out there!
