Dear RV-12 builder,

Ref: DWG 11-08

The WH-P30 5-conductor trim wire with your kit may have wires colored differently than as specified by the manual.

The colors are the same as those specified in the manual, except that instead of one of the two white wires, there is a white/red wire. This white/red wire can be connected as one of the white wires in the manual. It does not matter to which white wire on the servo it is attached.
