CNC Machine Operator

Van's Aircraft - Aurora, OR, USA

Compensation: \$21 to \$28 Hourly

Employment Type: Full-Time

We are currently recruiting experienced **CNC Operators** to join our CNC machining team on the day and swing shifts. Our CNC department produces aircraft parts to high standards, which are used by our customers to build high-performance small airplanes.

Responsibilities Include

- CNC machine operation
- Loading and unloading of parts and tools
- Setting up and indicating fixtures
- Recognizing and remedying nonstandard machine sounds, operations, and tool issues
- Reporting to department management on the effectiveness and efficiency of manufacturing processes and areas for improvement

Minimum Experience

- Machine/job-shop production experience and/or collegiate CAM curriculum
- Ability to read blueprints and understanding of basic GD&T

Preferred Experience

- Operation of Haas CNC mill and lathe (4th and 5th axis experience a plus)
- General familiarity with manufacturing processes
- Independent problem-solving skills
- Experience with automated production systems a plus

Shift differential pay is available for evening and weekend shifts. Pay rate will be established commensurate with experience.

No phone calls, please. To apply, please submit your resume and cover letter to jobs@vansaircraft.com.

About Van's Aircraft:

Van's Aircraft is the world-leading manufacturer of kit aircraft. Built on a proud heritage, the company is the market leader in the experimental-kit aircraft market, producing more kits than any other company in the world since 1972. Van's is experiencing record sales and growth and so we're expanding and enhancing our team. By the end of 2021, more than 11,000 RV kits had been completed and flown, and thousands more are currently under construction. Completion rates currently average about 1.5 per day. RVs are flying in more than 45 different countries and kits have shipped to more than sixty. From their humble beginnings on a small farm in Oregon in the early '70s, these wonderful airplanes have achieved a global following. And their popularity is not the result of any superior marketing campaign. Rather, they are popular because they fly so well and bring so much pleasure to their builders, who can't help but tell their friends (and take them for a ride, of course). After 50 years Van's Aircraft is solvent, strong, and alive with new ideas. The future presents plenty of opportunities and challenges, and we intend to meet them the way Dick VanGrunsven did when he first built the company: with honesty, practicality, diligence, and imagination. Join us in that mission!
