CNC Punch Press Operator - Swing/Weekend Shifts

Van's Aircraft - Aurora, OR, USA

Compensation: \$19 to \$22 Hourly

Employment Type: Full-Time

Van's Aircraft is looking for great people to join our factory staff making sheet-metal aircraft parts as operators on our CNC punch presses. Positions are open on our evening and weekend, for which we pay a shift differential. Do you have experience and the drive to do quality work? Apply today!

Job Requirements

The successful candidate must:

- be able to understand and follow assignments and exact directions
- be able to read a tape measure and calipers
- strive to deliver quality work
- have a positive work attitude
- work well with others

This job requires the use of basic math on a daily basis. A background in G-code is a plus. One year of CNC punch press operating experience is preferred, but we are willing to train the right person with similarly applicable experience.

Salary will be commensurate with experience. Starting range is \$19 to \$22 per hour, and a shift differential applies to evening and weekend shifts.

Benefits include health, dental, vision, short- and long-term term disability, and life insurance. We offer paid time off and a competitive wage. The company offers a 401(k) with company match (the company provides 50% of up to the first 8% of your pay) and an Employee Stock Ownership Plan as well as financial health and wellness benefits for employees - plus an employee flying club!

No phone calls, please. To apply, please submit your resume and cover letter to jobs@vansaircraft.com.

About Van's Aircraft:

Van's Aircraft is the world-leading manufacturer of kit aircraft. Built on a proud heritage, the company is the market leader in the experimental-kit aircraft market, producing more kits than any other company in the world since 1972. Van's is experiencing record sales and growth and so we're expanding and enhancing our team. By the end of 2021, more than 11,000 RV kits had been completed and flown, and thousands more are currently under construction. Completion rates currently average about 1.5 per

day. RVs are flying in more than 45 different countries and kits have shipped to more than sixty. From their humble beginnings on a small farm in Oregon in the early '70s, these wonderful airplanes have achieved a global following. And their popularity is not the result of any superior marketing campaign. Rather, they are popular because they fly so well and bring so much pleasure to their builders, who can't help but tell their friends (and take them for a ride, of course). After 50 years Van's Aircraft is solvent, strong, and alive with new ideas. The future presents plenty of opportunities and challenges, and we intend to meet them the way Dick VanGrunsven did when he first built the company: with honesty, practicality, diligence, and imagination. Join us in that mission!
