## TIG Welder

Van's Aircraft - Aurora, OR, USA

**Compensation: \$22 to \$29 Hourly**

**Employment Type: Full-Time**

*Pay commensurate with experience*

### Job Requirements

The successful candidate and employee will have general knowledge of both A/C and D/C machine setups. You must be able to weld .035 thick aluminum tubing and .045-.25 steel tubing repeatedly with consistency, and you must be capable of reading engineering drawings and welding symbols. We will also consider applicants who are proficient in welding 4130 steel. We are an aerospace company, so quality and consistency of work are critical. Forklift experience is a plus, but is not required.

All applicants will participate in a practical welding test during the interview process.

### Working Conditions

The work shift is 4:30 a.m. to 3:00 p.m., four days per week. This is a production welding job, and you must be physically able to sit and stand for long periods during the workday.

### Benefits

Benefits include health, dental, short-term disability, and life insurance. We offer paid leave and competitive wages. The company offers a 401(k) plan with company match and an Employee Stock Ownership Plan. We also have financial health and wellness benefits for our employees.

If offered a position, you will be required to complete a pre-employment drug screening and background check.

No phone calls, please. To apply, please submit your resume and cover letter to [jobs@vansaircraft.com](mailto:jobs@vansaircraft.com).

### About Van's Aircraft:

Van's Aircraft is the world-leading manufacturer of kit aircraft. Built on a proud heritage, the company is the market leader in the experimental-kit aircraft market, producing more kits than any other company in the world since 1972. Van's is experiencing record sales and growth and so we're expanding and enhancing our team. By the end of 2021, more than 11,000 RV kits had been completed and flown, and thousands more are currently under construction. Completion rates currently average about 1.5 per day. RVs are flying in more than 45 different countries and kits have shipped to more than sixty. From their humble beginnings on a small farm in Oregon in the early '70s, these wonderful airplanes have achieved a global following. And their popularity is not the result of any superior marketing campaign.

Rather, they are popular because they fly so well and bring so much pleasure to their builders, who can't help but tell their friends (and take them for a ride, of course). After 50 years Van's Aircraft is solvent, strong, and alive with new ideas. The future presents plenty of opportunities and challenges, and we intend to meet them the way Dick VanGrunsvan did when he first built the company: with honesty, practicality, diligence, and imagination. Join us in that mission!
